

ISPCE 2026

Attend the top Product Safety, Certification, and Global Compliance Conference

Experience three days of educational workshops and technical presentations given by industry experts focusing on pertinent topics concerning Product Safety, Certifications, and Global Compliance. Through ISPCE, participants have the opportunity to engage in inclusive, diverse, and collaborative discussions, fostering collective educational growth.

Why Attend?

Join the hundreds of companies that invest in sending their engineers to ISPCE each year for a high-value educational experience in product safety and compliance engineering. The conference keeps teams current on emerging requirements across EMC and EMI, wireless and IoT compliance, cybersecurity for connected devices, and what AI-enabled products mean for product certification. Attendees learn directly from industry leaders, gain exposure to proven compliance testing methodologies, and explore the latest design concepts shaping modern manufacturing, all while building lasting connections across the product compliance community.
